# Sprint [3] UI Prototypes

US006: As a condo management company, I want to set up common facilities requiring reservations. As a user, I want to reserve facilities through a calendar-like interface, with visibility into availability and a first-come-first-serve basis.

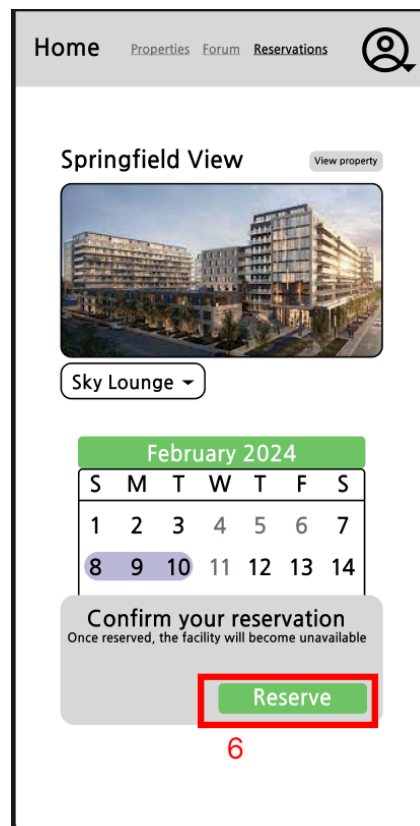

Landing Page

Facility Selection

Date Selection

<-- Reservation Confirmation

Steps:

1. The user accesses the property facility reservation landing page.
2. The user opens up the drop down menu to view all available facilities.
3. The user selects a facility from the drop down menu.
4. The user selects the days to reserve the facility.
5. The user finalizes the reservation by clicking the button.
6. The user confirms the reservation, confirming that the facility will be unavailable to others.
